SUMMARY OF SKILLS AND QUALIFICATIONS

Full stack developer with 5+ years building B2B SaaS at Keatext. Led frontend delivery for three years, driving TypeScript adoption, Redux Toolkit migration, and a monorepo architecture. Moved into full-stack work across Scala/ZIO, PostgreSQL, and AWS/Terraform. Experienced mentor and cross-functional collaborator in agile product teams.

Programming | • TypeScript • React • Redux & RTK/RTK Query • RTL • MUI • C# • Java • Scala • ZIO • NodeJS
• MySQL • PostgreSQL • RESTful API • Terraform

Tools | • IntelliJ • Visual Studio Code • Cursor • AWS • Git • GitLab & GitLab CI/CD • Auth0 • Postman • Slack

Languages | • English: Spoken & Written • French: Spoken & Written • Tamil: Spoken

EDUCATION

Bachelor of Computer Science – Web Services and Applications Co-op

January 2017 - April 2021

Concordia University, Montreal, QC

- Member of the Institute for Co-operative Education
- GPA 3.8

DEC in Computer Science & Technology

2017

Vanier College, St-Lambert, QC

- Honor Roll (2015)

WORK EXPERIENCE

Keatext, Montréal, QC

Full Stack Developer

Dec 2024 – May 2026

- Delivered features across the React/TypeScript frontend and Scala/ZIO backend, including PostgreSQL data access and Cube.js analytics integration.
- Managed AWS infrastructure provisioning and ongoing maintenance using Terraform.
- Built and maintained GitLab CI/CD pipelines for frontend and backend deployments.
- Partnered with backend engineers on API design, cross-layer debugging, and production incident response.
- Adopted AI-assisted development tooling (Cursor) to accelerate delivery, exploration, and onboarding on unfamiliar parts of the stack.

Frontend Developer

March 2021 – Dec 2024

- Built and tested features with TypeScript, React, Redux/RTK, Material UI, React Testing Library, Vite, and Vitest.
- Led the frontend team; collaborated with backend and product to plan, estimate, develop, and QA features in an agile workflow.
- Introduced TypeScript across the frontend codebase, improving type safety and code consistency.
- Migrated global state from vanilla Redux to Redux Toolkit and RTK Query, reducing boilerplate and server load through query caching.
- Reorganized the web application into an npm workspaces monorepo with Vite, simplifying white-label deployments and enabling a shared component library.
- Mentored junior frontend developers through code reviews, pair programming, and structured codebase onboarding.

AppDirect, Montréal, QC

Software Developer (Full Time - Internship)

Jan 2020 – May 2020

- Worked autonomously to create a Micro-UI project to extract functionality out from the existing AppMarket monolith application
- Worked with HTML/CSS, React, Redux, Redux Saga, Jest, and React Testing Framework to recreate functionality originally written in Apache Wicket
- Analyzed legacy code to reveal underlying functionality that was not easily perceptible from the legacy existing UI and implemented that functionality into the new project
- Implemented a Jenkins pipeline to run tests and build the project

Nuvei, Montréal, QC

Software Developer (Full Time - Internship)

Sept 2018 – Sept 2019

- Worked in a team to reconstruct old web applications in modern frameworks and new web technologies
- Worked with HTML/SCSS, jQuery, JavaScript, C#, ASP.Net Core, React, Redux, Typescript, Jest, and Enzyme to implement new features, fix existing features, and overall maintenance of the web application
- Communicated with Business Analysts and utilized user stories in order to implement features as requested by clients

Graphics M&H, Montréal, QC

Web Developer (Part Time)

Oct 2016 – Feb 2017

- Created HTML5 animated advertisements banners using HTML/CSS, ZeptoJS, GSAP and other animation libraries
- Worked alongside project managers and clients to meet their specific needs and make content adjustments
- Clients serviced include Sid Lee, Banque Nationale, SAQ, L'Oréal, and more
- Performed Quality Assurance testing and translation services using Excel and Sitecore Content Management System

Inovestor Inc., Montréal, QC

Web Developer (Full Time - Internship)

Jan 2016 – May 2016

- Created a time tracking & employee timesheet web application
- New concepts and skills required for the project were completely self-taught
- Worked with one other intern and started from scratch to design, develop, test, and present the application
- Utilized HTML/CSS, Bootstrap, AngularJS, jQuery, Entity Framework, and RESTful API to build the application
- Met with supervisors throughout the duration of the internship to discuss ways to improve the application

VMC Game Labs, Montréal, QC

Quality Assurance Tester (Part Time)

May 2015 – Oct 2016

- Tested various video games and reported issues into databases
- Worked with numerous tools like TestTrack, JIRA, Excel, and Outlook.
- Worked with in a team of around 15 – 30 people and several managers
